

MODERN APARTMENT BUILDING IN ESTONIA

Art perforated Liberta Cor-Ten used in apartment building

The modern Jahu 1a apartment building concludes the contemporary quality lifestyle with a pleasant environment. The authors of this modern and unique architecture building in Kalamaja are Alice Laanemägi, Katerina Veerde and Katrin Kapanen. Exciting roof shape variations, the use of different materials, composition of the wood panels, terraces and sun blinds fit in well at Kalamaja with its historical background.

The main entrance and parking spaces attract attention with Art perforated Liberta Cor-Ten 700 cassettes with back-lighting. Rye straws fit to the surroundings perfectly and contribute to the bohemian environment of the district.
